

ZOLLER Environmental Policy

ZOLLER is continuously improving its environmental performance

01

PRODUCTS

We attach great importance to product-related environmental protection – i.e. the environmental impact of ZOLLER products over their entire life cycle, from procurement to use and disposal. We place high demands on materials, design and energy consumption. All relevant and official requirements and specifications are met both for our products and at our site.

02

EMPLOYEES

How good a company is at environmental protection depends crucially on its employees. All ZOLLER employees take care to use resources sparingly – be it energy, water or consumables.

03

SUPPLIERS

When selecting our suppliers, in addition to quality and delivery reliability, the distance to the suppliers is also an important criterion. Wherever possible, all ZOLLER suppliers are located within a radius of 100 km. The short transportation routes save fuel and protect the environment.

04

WE TAKE RESPONSIBILITY FOR THIS:

Christoph Zoller, Management

Hartmut Schneider, QM/UM/MKZ

Christian Pfau, Research/Development/Design

Manuel Walter, Purchasing

Felix Thiel, Software

Philipp Krause, Sales

Georges Pappas, Electrical Engineering

Ivica Maras, Production
